PERSONAL PROJECTS

Electon

- Designed and developed a dynamic eCommerce platform using React.js with TypeScript, offering users an intuitive interface to browse and purchase products. Leveraged Tailwind CSS to ensure a visually appealing and fully responsive design, aligning seamlessly with contemporary market trends. The project embodies professionalism in both functionality and aesthetics, showcasing proficiency in modern web development technologies and a keen understanding of user experience principles.

Findr

- Developed "Person Finding," a React Native app enabling users to post images and information of missing individuals, aiding in their search. Incorporated features for reposting and sharing listings to increase visibility, with email notifications upon successful identification, fostering community engagement in reuniting lost individuals.
